Nifty 500: A great way to bet on India growth story

In order to capture The Big Leap in India Growth Story....

....Nifty 500 can be an excellent bet

Nifty 500 covers around ~90% of India's listed equity universe

■ Nifty 500 Index ■ India's Listed Universe Ex Nifty 500

Source/Disclaimer : IMF World Economic Outlook, MOAMC Research; *Nominal GDP growth in USD. Data as of close of 31-Mar-2024. India's Listed Universe Total Mcap www.bseindia.com; Nifty 500 Index Companies – NSE. The information / data herein alone is not sufficient and should not be used for implementation of an investment strategy. Drawing parallels with U.S. in 1980s to India today

Drawing parallels with U.S. in 1980s to India today

In the last 40 years, the US GDP grew ~8x while the total market-cap of listed US equity rose 28x.
Can India's GDP grow to US\$ 25 trillion by 2050? This could mean a 25x opportunity in Indian market

	U.S.		Growth (In times)	India		Growth (In times)
	1982	2022		2022	2050E	
GDP (US\$ trillion)	3.3	25.5	8x	3.4	25.0	8x
Market-cap (US\$ trillion)	1.4	38.7	28x	3.4	37.5*	11x (25x in INR#)
Market-cap to GDP (%)	40%	150%		100%	150%	

*Assuming a Market-cap to GDP ratio of 150% (the same as U.S. today), India's Market-cap could be US\$ 37.5 trillion with a GDP of US\$ 25.0 trillion in 2050E

#Assuming a 3% p.a. depreciation of INR against the USD, India's Market-cap in 2050 is expected to grow 25x in INR terms.

How the Indian market may look like in 2050

What a 25x growth in Market-cap could look like in 2050

A 25x growth in Market-cap could mean that the average Smallcap company in 2050 would be similar to the size of the average Largecap company in 2022

Source/Disclaimer : MOAMC Research; The information / data herein alone is not sufficient and should not be used for implementation of an investment strategy. The table/charts mentioned above are used to explain the concept and is for illustration purpose only It should not be construed as an investment advice to any party. Invest in India's 'S&P 500' i.e. Nifty 500

The **S&P 500** is a **Largecap index** in the U.S. that **covers more than 80% of U.S. listed market**
The **Nifty 50** on the other hand only **covers 51% of India's listed market**, and it is likely to shrink over time

S&P 500 covers 86% of U.S. listed market

Nifty 50 covers 48% of India's listed market

Nifty 500 is the solution!
it covers around ~90% of India's listed market

Source/Disclaimer : MOAMC Research; The information / data herein alone is not sufficient and should not be used for implementation of an investment strategy. Disclaimer

This presentation has been prepared and issued on the basis of internal data, publicly available information and other sources believed to be reliable. The information contained in this document is for general purposes only and not a complete disclosure of every material fact and terms and conditions. The information / data herein alone is not sufficient and shouldn't be used for the development or implementation of an investment strategy. It should not be construed as investment advice to any party.

All opinions, figures, charts/graphs, estimates and data included in this presentation are as on date and are subject to change without notice. The statements contained herein may include statements of future expectations and other forward-looking statements that are based on our current views and assumptions and involve known and unknown risks and uncertainties that could cause actual results, performance or events to differ materially from those expressed or implied in such statements. Readers shall be fully responsible / liable for any decision taken on the basis of this presentation. Investments in Securities are subject to market and other risks and there is no assurance or guarantee that the objectives of any of the Schemes will be achieved. The scheme may not be suited to all categories of investors.

The material is based upon information that we consider reliable, but we do not represent that it is accurate or complete, and it should not be relied upon as such. Opinions, if any, expressed are our opinions as of the date of appearing on this material only. While we endeavor to update on a reasonable basis the information discussed in this material, there may be regulatory, compliance, or other reasons that prevent us from doing so. Recipient shall understand that the aforementioned statements cannot disclose all the risks and characteristics. The recipient is requested to take into consideration all the risk factors including their financial condition, suitability to risk return, etc. and take professional advice before investing.

Passive Investments - The Scheme is not actively managed. Since the Scheme is linked to index, it may be affected by a general decline in the Indian markets relating to its underlying index. The Scheme as per its investment objective invests in Securities which are constituents of its underlying index regardless of their investment merit. The AMC does not attempt to individually select stocks or to take defensive positions in declining markets.

Index Fund - The Scheme being an index scheme follows a passive investment technique and shall only invest in Securities comprising one selected index as per investment objective of the Scheme. The Fund Manager would invest in the Securities comprising the underlying index irrespective of the market conditions. If the Securities market declines, the value of the investment held by the Scheme shall decrease.

Risks associated with overseas investment

To the extent the assets of the scheme are invested in overseas financial assets, there may be risks associated with currency movements, restrictions on repatriation and transaction procedures in overseas market. Further, the repatriation of capital to India may also be hampered by changes in regulations or political circumstances as well as the application to it of other restrictions on investment. In addition, country risks would include events such as introduction of extraordinary exchange controls, economic deterioration, and bi-lateral conflict leading to immobilisation of the overseas financial assets and the prevalent tax laws of the respective jurisdiction for execution of trades or otherwise.

Currency Risk:

The fund may invest in overseas mutual fund / foreign securities as permitted by the concerned regulatory authorities in India. Since the assets will be invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by changes/fluctuations in the value of the foreign currencies relative to the Indian Rupee.

Country Risk:

The Country risk arises from the inability of a country, to meet its financial obligations. It is the risk encompassing economic, social and political conditions in a foreign country, which might adversely affect foreign investors' financial interests.

Mutual Fund Investments are subject to market risks, read all scheme related documents carefully
